WHEELER DENOUNCES NEW ANTI-DRY LEAGUE

"The purpose of the Government is to promote the general welfare, not to protect sources of crime, misery, and drunkenness, like the liquor traffic," Wayne B. Wheeler, of the Anti-Saloon League, declared here last night as he denounced the "League of Rights," an organization formed recently in New York to oppose prohibition.

"These camouflage booze organizations deceive no one but the wet dupes who furnish the money for them," Wheeler added.

NEW CANADIAN PROVINCE IS PLAN OFFERED IN BILL

Prince Rupert City Council Approves Measure for Subdividing British Columbia.

PRINCE RUPERT, B. C., May 31.—Canada may have a new province formed of all British Columbia north of the fifty-second parallel and Yukon Territory. The proposal recently introduced in the Dominion Parliament at Ottawa is arousing great interest on the coast. The Prince Rupert city council went on record as approving it.

The resolution providing for the new province was sponsored in the House by Col. C. W. Peck, of the Skeena District of British Columbia, and seconded by Dr. A. Thompson.

of the Yukon. It pointed out that "the natural resources of northern British Columbia and the Yukon are of similar character, these resources are being developed and as a result the population is increasing rapidly; it is fully expected that the census to be taken soon will show sufficient population to warrant the creation of the new province, and the building of the Grand Trunk Pacific Railway, created a natural political division." The resolution provided for a plebiscite to determine whether the province shall be formed.

The Grand Trunk Pacific Railway, now a part of the government-owned Canadian National Railway, enters British Columbia by way of Yellowhead Pass and runs northwesterly to Prince Rupert on the Pacific coast. The road divides the province almost exactly in half. The geographical center of the province is a few miles south of Vanderhoof. The road passes through what is known as the lake region of central British Columbia. This is a fine agricultural area being rapidly settled, but the greater part of the country north of the road, while rich in timber and minerals, is largely undeveloped. The Yukon extends to the Arctic coast and contains the Klondike gold fields.
